

LUCID FRAMES

Interactive AI Visual Installation

CONCEPT

Lucid Frames is an interactive visual installation that transforms audience movement into real-time AI-generated visuals. Visitors don't just watch — they become part of the artwork. Every gesture reshapes the projection, creating a constantly evolving collective visual experience.

WHY IT WORKS FOR FESTIVALS

- attracts visitors through curiosity + participation
- creates strong social media content
- increases dwell time in experience areas
- scalable from indoor rooms to large open air
- works day or night, depending on projection surface

HOW IT WORKS

- Motion Tracking → Live Data Processing → AI Generation → Projection Output
- camera detects silhouettes
- software analyzes movement
- AI generates visuals in real time
- projection reacts instantly to crowd

WHO WE ARE

We are Ben & Dave, a Berlin-based hybrid audiovisual artist duo combining electronic music, AI systems, and real-time visual performances to create an immersive experience for the audience.

TECH SETUP

PROVIDED: camera, projector, computer, software, cables, etc.)

NEEDED: power + projection surface

SETUP: 2h

SPACE: flexible

SELECTED EXPERIENCE

- Fusion Festival
- Subardo Festival
- Club Sisyphos Berlin
- KitKat Club Berlin

FORMAT OPTIONS

- Experience Area Installation
- Artist Live Visual
- Stage Visual Add-On
- Night Program Feature
- Interactive Art Zone

MEDIA

- [Live Showreel](#)
- [Dance Performance Reel](#)
- [Socials](#)
